Professional Summary

A passionate IT developer with over 3 years of hands-on experience in building full-stack web and mobile applications. Adept at working across a range of technologies including Flutter, Laravel, and Node.js, with a strong grasp of modern frontend and backend development practices. Skilled at turning complex business requirements into clean, efficient, and user-friendly digital solutions. Comfortable collaborating with cross-functional teams, communicating technical ideas clearly, and adapting quickly to new tools and workflows.

Known for being a creative problem-solver who values simplicity and performance, and consistently delivers scalable and maintainable code. Whether it's streamlining internal business processes or building customer-facing platforms, I take pride in creating systems that are not only functional but also bring real value to users. I'm driven by impact, improvement, and learning—always aiming to build better with each project I work on.

Core Skills

- **Programming & Frameworks:** Flutter, JavaScript (Next.js, Node.js, Express.js, React.js), TypeScript, PHP, Laravel,

Professional Experience

Fullstack Developer

PT Bank Mega Tbk, South Jakarta | 02/2023 – Present
Project:

- **Complaint Dashboard – Bank Mega**
Developed a web-based complaint monitoring dashboard using Next.js and Express.js to visualize and track customer issues in real-time.
- **Telkomsel & Antavaya Reconciliation Platform**
Built a monthly reconciliation platform for third-party billing using Next.js and Express.js to automate financial matching and validation processes.
- **CT Connect Mobile Application**
Created a mobile application using Flutter to enhance employee engagement, internal communication, onboarding, job postings, and merchant promotions within CT Corp.
- **Foreign Exchange Transfer Claim Module**
Developed an automated system using Laravel for handling claim submissions, approvals, and reimbursement journal crediting for forex transactions.
- **Mark to Market Statement Generator**
Designed a web tool using Laravel to automate the creation of Mark to Market (MtM) financial statements, replacing manual Excel-based processes.
- **Payroll Onboarding Dashboard**
Implemented a payroll account onboarding dashboard using Next.js and Fastify to digitally manage and streamline employee payroll account openings between companies and Bank Mega.

IT Development Program

PT Bank Mega Tbk, South Jakarta | 08/2022 – 02/2023

- Gained foundational knowledge in general banking operations, risk management, IT compliance, and regulatory frameworks relevant to the banking industry.
- Trained in Java Spring Boot for developing secure and scalable backend services.
- Learned to build cross-platform mobile applications using Ionic Framework.
- Acquired practical skills in creating native-looking mobile apps using Flutter for Android and iOS platforms.

IT Developer

EcoEdu.id | 09/2021 – 02/2022

- Designed and developed Ecoedu.id & Elearning.ecoedu.id into responsive, user-friendly websites.
- Maintained site security, content updates, and improved user engagement and traffic.
